

Sarker.shop - Complete Features List

Sarker.shop Complete Features List

A comprehensive overview of all the features and capabilities of the Sarker.shop e-commerce platform.

1. Customer-Facing Features (Frontend)

Product Discovery & Shopping

- * Home Page: Dynamic hero banners, featured categories, best-selling products, and trending sections.
- * Product Grid/List View: Responsive layout for browsing products with instant "Add to Cart" functionality.
- * Advanced Filtering & Sorting: Filter products by price range, star ratings, and brands. Sort by newest, price, or rating.
- * Global Search: Search for products by name or SKU from any page.
- * Category Navigation: Intuitive multi-level category navigation (e.g., Electronics > Smartphones).
- * Product Details Page:
 - * High-quality image gallery with zoom and preview.
 - * Sticky sub-navigation for quick access to Info, Description, and Reviews.
 - * SKU and availability tracking (In Stock / Out of Stock).
 - * Related products recommendation based on categories/brands.

Checkout & Cart Management

- * Persistent Shopping Cart: Real-time cart updates, item counters, and subtotal calculations.
- * Multi-step Checkout: Smooth checkout flow including shipping details and order summary.
- * Geolocation Integration: Accurate address selection using preloaded Division, District, and Sub-district data (tailored for Bangladesh).
- * Guest Checkout: Support for non-registered users via UUID tracking.

Account & Dashboard

- * User Authentication: Secure JWT-based login (Email/Password), registration, and social login support.
- * Password Management: Integrated Forgot/Reset Password flow and Email Verification.
- * User Profile: Update profile details (Name, Email, Phone) and upload personal avatars.
- * Order History: View all past orders with detailed status logs and summaries.
- * Order Tracking: Real-time order tracking using Order ID and Phone/Email.
- * Address Book: Manage multiple shipping/billing addresses.

Sarker.shop - Complete Features List

Support & Communication

- * Real-time Live Chat: WebSocket-powered customer support chat for instant assistance.
 - * Contact Center: Interactive contact form with map integration and store location details.
 - * Product Q&A: Ask questions directly on product pages and see admin answers.
 - * Reviews & Ratings: Rate products and leave text reviews with admin approval.
-

2. Administrative Features (Admin Dashboard)

Oversight & Analytics

- * Dashboard Overview: Key metrics (Total Sales, Orders, Customers) with visual charts (Line/Pie/Bar).
- * Recent Activities: Real-time feed of system events, new orders, and user registrations.
- * Financial Reports: Detailed sales analytics, best-selling product reports, and payment logs.

Product & Inventory Management

- * Full CRUD Support: Add, Edit, Delete, and Clone products with ease.
- * Media Management: Upload and manage multiple product images with automated WebP optimization (background conversion).
- * Variant Handling: Manage product attributes (Color, Size, Material, etc.).
- * Inventory Control: Real-time stock tracking and inventory status management.
- * Brands & Categories: Complete management of product organization taxonomies.

Order & Customer Management

- * Order Lifecycle Management: Process orders from Pending to Delivered with detailed status tracking.
- * Order Timeline: Visual log of every status change and internal note for each order.
- * Customer Database: Comprehensive list of all registered users with their full shopping history.
- * Staff Roles: Manage user permissions (Admin, Staff, Customer).

Engagement & Support

- * Support Inbox: Centralized real-time chat interface to handle multiple concurrent customer conversations.
- * Review Moderation: Approve or reject customer reviews before they go public.
- * Q&A Moderation: Answer customer questions on product pages directly from the dashboard.

Sarker.shop - Complete Features List

- * Contact Messages: Manage and reply to messages from the frontpage contact form.
-

3. Technical & Infrastructure Features

Core Backend (API)

- * Django REST Framework: A robust, scalable API core handling all logic.
- * JWT Authentication: Secure, stateless session management.
- * Async Communication: Django Channels and WebSockets for real-time chat and notifications.
- * Background Tasks: Celery & Redis for long-running processes like email delivery and image processing.
- * Database: PostgreSQL for reliable data storage with optimized indexing.

Modern Frontend

- * React.js: High-performance, component-based user interfaces.
- * Framer Motion: Smooth, premium micro-animations and transitions.
- * Tailwind CSS: Utility-first styling for a sleek, responsive, and consistent design.
- * AuthContext: Centralized state management for user sessions and profile sync.

DevOps & Deployment

- * Dockerized Architecture: Standardized environments for Local, Dev (Staging), and Prod.
- * Nginx Reverse Proxy: Secure traffic routing with SSL (Let's Encrypt) integration.
- * Standardized Deployment Flow: Automated `loc > dev > prod` workflow using GitKraken and Docker Compose.
- * Automated Assets: Automated WebP and WebM conversion for images and videos to ensure blazing-fast load times.
